Let's Start!

Writing Spot: I can't wait. I need my money now!

Learning Outcome

Explain about technology and technical problems in communicative situations.

Ask your partner:

- How often do you use ATM machines?
- How do you withdraw money? From an ATM? In person at the bank?

Can Do Statements

- I can write about technology and gadgets.
- I can write a short persuasive paragraph.
- I can write complex statements using words like *who*, *that* or *which*.

Let's Explore!

Listen to persuasive text below about ATM machines. Out of all the inventors you have read about, **whom*** do you admire the most? Notice how the text is **structured****.

* object pronoun for people

** the style and format

Instructions: Read the text aloud.

John Shepherd-Barron was an inventor who had a brilliant idea in 1965. Each weekend he had to visit the bank that opened between 9:30 and 12:30, and take out the money that he needed for the weekend. If he did not have enough time to do this, he was left without cash until the bank opened again.

He finally realized that many people had this problem. Taking an example from vending machines that sell snack food, he invented a machine that would give people money after they typed in a four-digit code number. The invention of the ATM is a key technological invention of recent times.

In the past, people actually had to go to the bank during working hours and wait in line which was very frustrating. With the invention of the ATM, people can now get cash any time, even when they are traveling. As a result, people are rarely ever left without money.

Over time, the ATM has also become a tool for paying bills and transferring money. Therefore, the main advantages of ATMs are that they allow easy access to banking services and help save time.

However, ATMs are not perfect, and they do have some disadvantages. On one hand, they are not available everywhere and banks do charge fees for using them. On the other hand, these machines are so much more accessible than the bank that they are worth the price of the ATM service and the time needed to find a machine. And today they are so widespread that it is hard to go a few blocks anywhere in the world without finding an ATM.

In summary, there is no doubt the ATM has added far more benefits than problems to our lives. It is truly an example of great technology in action developed by someone whose goal was to improve our way of life.

Let's Practice!

In a persuasive essay, writers often use both advantages and disadvantages to present their positions. Which of the sentences below present advantages of the ATM machine, and which present disadvantages?

Instructions: Classify the sentences into the correct box.

1. There are many places where banking is not available.
2. People do not have to go to a bank to get money, so money and banking are more accessible.
3. Banks charge a fee for using ATMs.
4. You can get cash through an ATM even when you are traveling.
5. People can get money even when the bank is closed.
6. ATMs are available nearly everywhere, so help people save time.

Advantages

Disadvantages

Let's Practice!

Can you remember the persuasive text? Let's find out!

Instructions: Circle all the subject or object relative pronouns in each sentence.

1. John Shepherd-Barron was an inventor who had a brilliant idea in 1965.
2. He invented a machine that would give people money after they typed in a four-digit code number.
3. It is truly an example of great technology in action developed by someone whose goal was to improve our way of life.
4. In the past, people actually had to go to the bank during working hours and wait in line which was very frustrating.

Extension Activity

You are going to write a persuasive essay about the advantages of a technological invention. You have to decide what side of the argument you agree with.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Find an interesting technological invention online.
- Write a 150-180 word persuasive essay on it.
- Use persuasive essay structure and planning.
- Write about advantages and disadvantages.
- Use connectors of contrast.
- Read your essay to someone.
- Have them ask you:
 - What invention is discussed in your essay?
 - What is your main claim about this invention?
 - What three important points support your main claim?
 - What points could some people use to argue against your main claim?
 - What is the main conclusion in your essay?

Self-Assessment

Yes No

I research technological inventions online.

☐ ☐

I write a persuasive essay on technology.

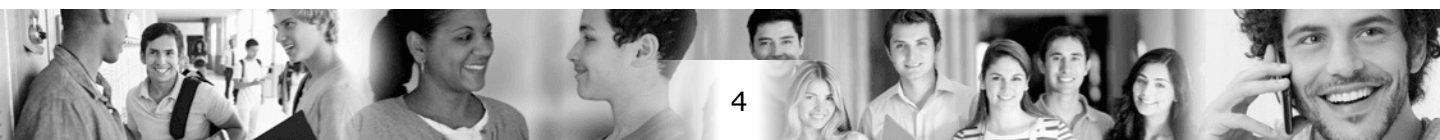

☐ ☐

I respond to questions about my essay.

☐ ☐

Target Words

- vending machine** (noun): a machine that you put money into in order to buy food or drinks
e.g. Taking an example from vending machines that sold snack food, he invented a machine to dispense money.
- claim** (noun): a statement saying something is true
e.g. You need to make claims in your persuasive essay.
- tool** (noun): an object that helps you do something
e.g. Over time, the ATM has also become a tool for paying bills and transferring money.
- accessible** (adjective): able to be reached or approached
e.g. These machines are so much more accessible than a bank.
- in action** (expression): regularly in use
e.g. It is truly an example of great technology in action.
- widespread** (adjective): common over a wide area or among many people
e.g. Today they are so widespread.
- block** (noun): an area of land surrounded by four streets in a city
e.g. It is hard to go a few blocks anywhere in the world without finding an ATM.
- digit** (noun): a written symbol for any of the numbers 0 to 9
e.g. He invented a machine that would give people money after they typed in a four-digit code number.

Learning Points

Persuasive Writing

In a persuasive essay, the writer always uses facts to support his or her point of view.

In a persuasive essay, the writer often presents some of the claims against his or her position and then presents other arguments against these claims.

Strong adjectives and adverbs give the reader a clear and rich picture of a situation.

You use connectors of contrast (for example: *on one hand / on the other hand, thus, therefore, as a result*) to express relationships between ideas and to combine sentences. Other connectors are used to show the beginning of a conclusion or summary (*in summary, in conclusion*).

Examples:

- *However, ATMs are not perfect, and they do have some disadvantages.*
- *In summary, there is no doubt the ATM has added far more benefits than problems to our lives.*

Subject and Object Relative Clauses

You use relative clauses to make clear which person or thing you are talking about.

When you use a relative clause to replace a noun, you use *who, whose, which* or *that*.

Example:

Did you see the person who just used the ATM?

The police said that the robbery that happened at the bank yesterday was frightening for customers.

You can also use a relative clause for objects.

Example:

You shouldn't believe everything that you see on TV.

Have you seen those people who we met at the restaurant?

Learning Points

Relative Pronoun	Use	Example
who	subject or object pronoun for people	<i>I told you about the teller who charged me extra fees.</i>
which	subject or object pronoun for animals and things	<i>Did you see the mouse which was running around the kitchen?</i>
whose	possession for people, animals and things	<i>Do you know that girl whose father is the bank manager?</i>
whom (generally very formal)	object pronoun for people (people often use who)	<i>He was invited by the manager whom he met on the weekend.</i>
that	subject or object pronoun for people, animals and things (where <i>who</i> or <i>which</i> are also possible)	<i>Can you pass me the chair that you find the most comfortable?</i>

Examples:

- *John Shepherd-Barron was an inventor who had a brilliant idea in 1965.*
- *He invented a machine that would give people money after they typed in a four-digit code number.*
- *It is truly an example of great technology in action developed by someone whose goal was to improve our way of life.*
