Let's Start!

What does a robot look like?

Learning Outcome

Explain about technology and technical problems in communicative situations.

Ask your partner:

- What movie robot do you find interesting? Why?
- What type of robot would you find helpful?

Can Do Statements

- I can talk about technology and gadgets.
- I can express complex statements using words like *who*, *that* or *which*.
- I can talk about wishes and imaginary situations.

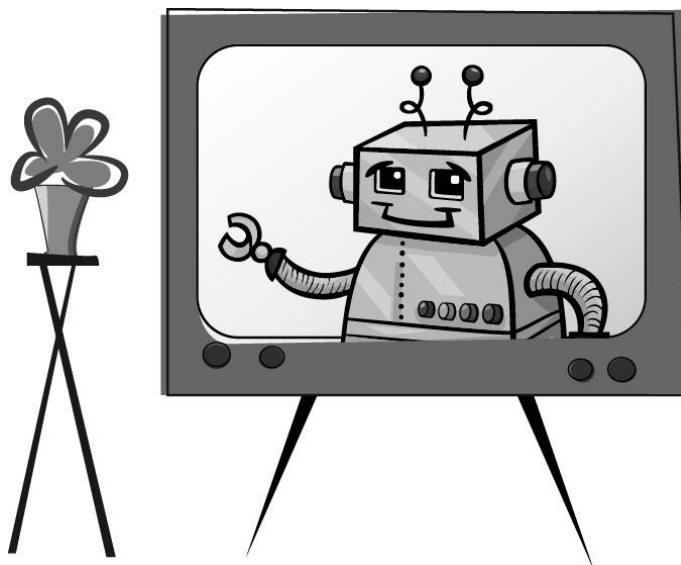

Let's Explore!

Let's watch ***The Jetsons****!

* "*The Jetsons*" are a cartoon family living in the future who have many technological appliances to help them.

Instructions: Read the text aloud.

In Karel Capek's play, *R.U.R.*, robots were featured for the first time. The mechanical workers were created by a wealthy industrialist who had them run his factory. They revolted and took it over. After this, robots began to appear in films, novels, and on TV. Many were benevolent. Some were not.

In 1950, Isaac Asimov posed questions in *I, Robot*. What if there came a time when robots were just like people? What would the world be like if robots enjoyed the same rights that humans enjoy? What laws would govern them?

These questions prompted others. As we ventured into the future, how would robots integrate into our lives? *Lost in Space* and *Forbidden Planet* showed oversized robots as part of exploration teams. In *The Jetsons* robot Rosie, who rolled around on castors, cared for the family.

Star Wars featured protocol translator C-3PO and his long-time counterpart, R2-D2. Then came *WALL-E*, the robotic unit which scientists designed to clean up a waste-covered Earth, who fell in love.

What famous robot do you wish you could invite into your life?

Let's Practice!

What if we were ruled by robots?

Instructions: Organize the mystery sentence.

1. were / if / What / like / time / there / a / ? / just / robots / when / people / came
2. us / with / equals / the / robots / as / be / world / What / would / if / like / lived / ?
3. how / they / people / ventured / lives / integrate / '50s / robots/ info / As / their / would / . / the / the / wondered / into / from / future,

Let's Practice!

Name the person *who* or the the thing *which* ...

Instructions: Draw a line to match the sentences in Column A and Column B.

COLUMN A

1. Larger than usual
2. A small wheel
3. Acceptable behavior
4. A place for manufacturing
5. A person in industry
6. Travel in an unknown area
7. Operated by a machine

COLUMN B

- a. oversized
- b. castor
- c. factory
- d. industrialist
- e. exploration
- f. mechanical
- g. protocol

Extension Activity

Describe a robot that you have seen in a cartoon, in a film or on a TV show.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Write a description of the robot in complex sentences.
- Explain what the robot looked like and how it acted.
- Describe how it integrated with people.
- Say if you wished you could have a robot like that or not and why.
- Read your writing out loud alone or to a partner.

Self-Assessment

Yes **No**

I write about a robot using some technological vocabulary.

☐ ☐

I use complex statements with words like *who*, *that*, *which*.

☐ ☐

I write about wishes and robots.

☐ ☐

I share my description.

☐ ☐

Target Words

- **mechanical** (adjective): operated by machine
e.g. Mechanical workers were created by a wealthy industrialist.
- **industrialist** (noun): an owner in a high position in industry
e.g. The industrialist wanted robots to work in his factory.
- **to revolt** (verb): to take action against authority
e.g. The robots in the factory revolted.
- **benevolent** (adjective): kind; helpful
e.g. Some robots on film were benevolent. Others were destructive.
- **to pose** (verb): to ask
e.g. He posed an interesting question.
- **oversized** (adjective): larger than usual
e.g. Forbidden Planet showed an oversized robot as part of the exploration team.
- **to prompt** (verb): to make something happen
e.g. The first question prompted others.
- **castor** (noun): a small wheel
e.g. The robot ran on small castors.
- **to integrate** (verb): to mix and join
e.g. How do you see robots integrating into our lives?
- **protocol** (noun): rules and acceptable behavior
e.g. Star Wars featured protocol translator C-3PO.

Learning Points

Subject and Object Relative Clauses

When you want to clarify which person or thing you are talking about, you use a relative clause.

You can begin a relative clause with *who* for people, *which* for things or *that* for either people or things.

In spoken English you usually use *that*, rather than *which* or *who*.

You put the relative clause immediately after the noun it talks about.

A subject relative clause describes the subject of the clause.

Example:

*The man **who/that** called wanted to speak to Tom.*

Which man? The man who called.

The clause *who called* immediately follows man - the noun it describes.

An object relative clause describes the object of the clause.

Example:

*The book **which/that** I lent you was my father's.*

Which book? The book I lent you.

Example	Clause	Relative Connector	Type of Relative Clause
<i>WALL-E was the robotic unit who fell in love.</i>	who fell in love	who	subject
<i>It was 'The Jetsons' robot Rosie, who rolled around on casters.</i>	who rolled around on casters	who	subject
<i>WALL-E was a robotic unit which scientists designed to clean up Earth.</i>	which scientists designed to clean up Earth	which	object
<i>Robots will enjoy the same rights that humans enjoy.</i>	that humans enjoy	that	object

Learning Points

Talking About Wishes and Imaginary Situations

You use *wish* to talk about things you do not have/do or cannot have/do.

You use the second conditional to talk about situations that are possible, but not likely.

Wish form:

Wish + that-clause (you can leave "that" out)

Second conditional form:

If + past simple, modal (could, would, should, might)

Example Sentence	Meaning
<i>I wish I had a new car.</i>	I want a new car but I don't have a new car.
<i>He wished he could go with us.</i>	He wants to go but he cannot go.
<i>If she were taller, she could be a model.</i>	She is not taller so she cannot be a model.
<i>If I won a lot of money, I would travel.</i>	I haven't won a lot of money so I am not traveling.

Examples:

- *What would the world be like if robots enjoyed the same rights that humans enjoy?*
- *If we ventured into the future, how would robots integrate into our lives?*
- *What famous robot do you wish you could invite into your life?*
