Let's Start!

Give me a tall ship and a star to steer her by.

Learning Outcome

Explain about technology and technical problems in communicative situations.

Ask your partner:

- How easy do you think it is to navigate by the stars?
- How do you usually find a new place that you want to go to?

Can Do Statements

- I can talk about technology and gadgets.
- I can speculate about feelings and impressions.
- I can express complex statements using words like *who*, *that* or *which*.

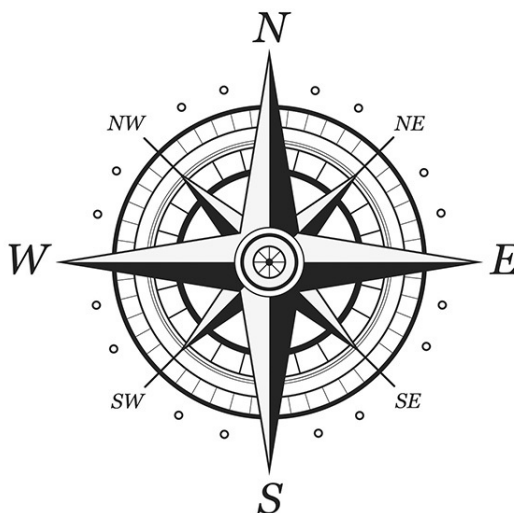

Let's Explore!

Who lives on the **Blue Marble***?

* "The Blue Marble" is a famous photograph of the Earth, taken by the crew of the Apollo 17 in 1972.

Instructions: Read the text aloud.

Where are things going?

In ancient times, people found their way by looking at the sun and stars. Later, they invented compasses, then learned to draw accurate maps. Maps must still be the most usual way to find a place. However, many people have trouble reading them.

Cars can have navigational devices that help you find your way. If you're walking, you could ask your cellphone for the directions that you need. You might have to ask it more than once. I usually do. Only yesterday I stood on a corner talking to the dark rectangle which sat in my hand. I never found the place that I was looking for.

Soon we may be able to get a microchip implanted in our brain that will allow us to access the Internet and of course those elusive maps that we need to get around.

We might link with Earth's satellites to catch the news and views. We may even connect with a traveling space probe to see the blue marble that we live on from afar. Then, we could turn outward to take in all of the unmapped space.

Let's Practice!

Complete the missing words!

Instructions: Choose the words from the Word Bank to correctly complete the sentences.

Word Bank

devices / cellphone / rectangle / place / microchip

1. There are navigational _____ that help you find your way when you drive.
2. You can ask your _____ for the directions that you need.
3. I stood on a corner talking to the dark _____ which sat in my hand.
4. I never found the _____ that I was looking for.
5. In the future we could have a _____ that will allow us to access the Internet implanted in our brain.

Let's Practice!

Let's look at technology and gadgetry!

Instructions: Clasify the sentences into the correct box.

- space probe
- cellphone
- unmapped space
- directions
- microchip
- navigational device

- satellite
- Internet
- dark rectangle
- compass
- our brains
- blue marble

Technology or Gadgets

Not Technology or Gadgets

Extension Activity

Write about a person and speculate about their feelings and situation.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Choose three photos from a magazine, a newspaper or the Internet to write about.
- Write 4 or 5 sentences about each picture.
- Speculate about the situation, what is happening and how the people feel.
- Use complex sentences with who, that or which where possible.
- Show your pictures to someone and read your sentences to them.

Self-Assessment

Yes

No

I write about 3 separate pictures, speculating on the situation, action, and people's feelings.

☐ ☐

I use complex sentences with who, which or that.

☐ ☐

I share my written ideas with another person.

☐ ☐

Target Words

- **compass** (noun): a device for finding direction
e.g. They invented compasses, then learned to draw accurate maps.
- **navigational** (adjective): relating to planning a route
e.g. Cars have navigational devices to help you find your way.
- **microchip** (noun): a small electronic device
e.g. Soon we may be able to get a microchip implanted in our brain.
- **implant** (verb): to put into the body
e.g. Would you want to have something implanted in your brain?
- **elusive** (adjective): hard to catch
e.g. He tried to write down that elusive thought he had.
- **to link** (verb): to connect with
e.g. We might be able to link with Earth's satellites.
- **afar** (noun): from a great distance
e.g. He admired her from afar.
- **probe** (noun): a device to look closely at things
e.g. We may even connect with a traveling space probe.
- **marble** (noun): a small ball of colored glass
e.g. We could look back at our blue marble from afar.
- **unmapped** (adjective): unknown; uncharted
e.g. We could turn outward to take in all of unmapped space.

Learning Points

Modal Verbs for Speculation

You can use modals to talk about degrees of certainty.

You use them to describe what is definite, probable, possible, or impossible from the speaker's point of view.

You can use *must*, *may*, *might*, and *could* to describe degrees of certainty.

Must = it's very likely

Must not / *Could not* / *Can't* = it's not possible

May / *Might* / *Can* / *Could* = it's possible

May not / *Might not* = it's possible this is not true

Modal	Meaning
He must be at work.	It's very likely he's at work.
I can't get her. Her phone must be off.	It's likely her phone is off.
They could come over for dinner tomorrow.	Them coming for dinner tomorrow is possible.
They may not come to the movie tonight.	It's possible they are not coming to the movie tonight.

Examples:

- *Maps must still be the most common way to find a place.*
- *Cars can have navigational devices that help you find your way.*
- *If you're walking, you could ask your cellphone for the directions that you need.*
- *You might have to ask it more than once.*
- *Soon we may be able to get a microchip implanted in our brain.*

Learning Points

Subject and Object Relative Clauses

You put a relative clause immediately after the noun it talks about.

You use a relative clause with *who* for people to make the who you are talking about clearer.

You use a relative clause with *which* for things to make the thing you are talking about clearer.

In spoken English and written English, *that* often replaces *which* or *who*. *Which* is generally more formal than *that*.

Example	Clause	Relative Connector	Type of Relative Clause
<i>I stood on a corner talking to the dark rectangle which sat in my hand.</i>	which sat in my hand	which	subject
<i>We may be able to get a microchip that will allow us to access the Internet.</i>	that will allow us to access the Internet	that	subject
<i>We can access those elusive maps that we need to get around.</i>	that we need to get around	that	object
<i>Ask your cellphone for the directions that you need.</i>	that you need	that	object
