Let's Start!

I love watching high-tech sci-fi films!

Learning Outcome

Explain about technology and technical problems in communicative situations.

Ask your partner:

- What sci-fi movies have you seen?
What were the characters like?
- What have you been reading lately?
- If you had a choice, would you rather read or watch a movie?

Can Do Statements

- I can talk about technology and gadgets.
- I can talk about wishes and imaginary situations.
- I can talk about recent actions and routines.

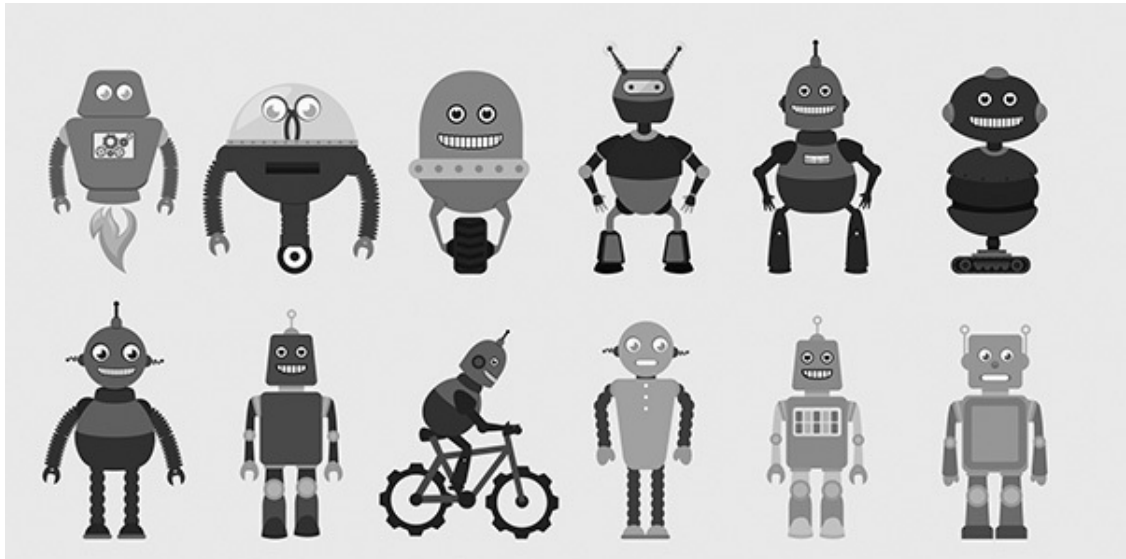

Let's Explore!

Ah ... robot adventures **on the silver screen***!

* When you say something is "*on the silver screen*", you mean that it is playing at a movie theater.

Instructions: Read the text aloud.

Science fiction writers have been predicting the rise of robots since the early 20th century. They have told us stories, both fascinating and terrifying. Now CGI has made these tales easy to depict, seamlessly integrating the fantastic and the real. On the silver screen, humans have traveled through the matrix to fight a race of machines living off human body heat and electrochemical energy. Cars have transformed into fighting machines.

It's opening night and people have been standing in line for hours. They want to be one of the first to see their favorite robot, cyborg, android or armor-enhanced hero.

If these people went to the movies a week later, there would be no line. However, if they stayed home, they wouldn't be part of the excitement or robot geek camaraderie.

They would tell you with certainty that if you grew up watching a sci-fi cartoon or reading a comic book, you wouldn't want to miss it come to life on the big screen.

If you've been waiting outside the theater with us, you know what I mean.

**Let's Practice!**

What would happen if ... ?

Instructions: Draw a line to match the sentences in Column A and Column B. When you complete the sentences, read the sentences aloud with your partner. Check your pronunciation with your instructor.

COLUMN A

1. If these people went to the movies a week later,
2. If they stayed home,
3. If you grew up watching a sci-fi cartoon or reading a comic book,
4. If you were standing here with me
5. I wish you were here

COLUMN B

- a. they would not wait in the opening night line.
- b. they wouldn't be part of the excitement.
- c. you wouldn't want to miss it come to life on the big screen.
- d. you would understand what I meant.
- e. so you could see the movie with me.

**Let's Practice!**

How long have you been waiting outside the theater?

Instructions: Choose the words from the Word Bank to correctly complete the sentences.

Word Bank

fiction / stories / tales / matrix / fighting / standing

1. Science _____ writers have been predicting the rise of robots since the early 20th century.
2. They have told us _____, both fascinating and terrifying.
3. Now CGI has made these _____ easy to depict.
4. On the silver screen, humans have traveled through the _____ to fight a race of machines.
5. Cars have transformed into _____ machines.
6. It's opening night and people have been _____ in line for hours.

Extension Activity

Write about what you have studied in English class.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Write 100 words explaining why you have been studying English.
- Say how long/where/with whom you have been studying.
- Explain what you have studied so far and what has or hasn't helped you move forward.
- Read your written piece aloud alone or to another person.

Self-Assessment

Yes No

I talk about my recent routines in my English studies.

☐ ☐

I talk about recent actions in my English studies.

☐ ☐

I talk about things that have or haven't helped me move forward.

☐ ☐

Target Words

- **to predict** (verb): to say what will happen in the future
e.g. Science fiction writers have predicted the rise of robots.
- **CGI** (noun): computer generated imagery
e.g. The CGI in the movie made it seem like we were in space!
- **to depict** (verb): to show; to represent
e.g. CGI has made science fiction stories easier to depict.
- **seamlessly** (adverb): without problems
e.g. CGI seamlessly integrates the fantastic and the real.
- **electrochemical** (adjective): related to electricity-made chemical changes
e.g. In "The Matrix", people fight machines that live off human body heat and electrochemical energy.
- **cyborg** (noun): a being that is part human and part machine
e.g. There are cyborgs in the "Star Trek" series!
- **android** (verb): a human-like robot
e.g. In "Star Wars", C-3PO was a protocol android.
- **enhanced** (adjective): improved in quality
e.g. Some superheroes are enhanced humans.
- **geek** (noun): a person who is obsessively detail oriented in one area
e.g. We robot geeks are off to see the robotics fair.
- **camaraderie** (noun): a friendly feeling with people you share an experience with
e.g. The people standing in line shared a sense of camaraderie.

Learning Points

Talking about Wishes and Imaginary Situations

You use *wish* to talk about things you do not have/do or cannot have/do.

You use the second conditional to talk about situations that are possible, but not likely.

When you use the second conditional, you are imagining the future. You are thinking about a specific condition in the future. You are also considering the result of the condition. However, the condition is very unlikely to happen.

You can also use *should*, *could* or *might* in place of *would*, in the second conditional.

Condition (Past Simple tense)	Result (would + base form)
<i>If you went to see the movie in a week,</i>	there might be no line.
<i>If they stayed home,</i>	they wouldn't be part of the excitement.
<i>If you grew up reading the comic book,</i>	you wouldn't want to miss it come to life on the big screen.
<i>If you were standing here with me,</i>	you would understand what I meant.
<i>I wish you were here so</i>	you could see the movie with me.

We use a comma after the *if* clause when it is at the beginning of the sentence. This shows that the sentence is not in the natural order.

Learning Points

Present Perfect Continuous vs. Present Perfect

Both the Present Perfect and the Present Perfect Continuous are used to show that an action began in the past and is still continuing or has just finished.

You use the *Present Perfect* to emphasize the completion of an action or the result. So, when you want to say what has happened so far, use the Present Perfect tense.

You use the *Present Perfect Continuous* to emphasize the length and duration of an action. So, when you want to say how long an action has been happening, use the Present Perfect Continuous tense.

Present Perfect (What ... ? How much ...?)	Present Perfect Continuous (How long ... ?)
<i>They have told us many stories predicting the rise of robots.</i>	<i>Science fiction writers have been predicting the rise of robots since the early 20th century.</i>
<i>Now CGI has made these tales easy to depict.</i>	<i>They have been filming the latest sci-fi epic for the last two years.</i>
<i>I have stood in line to see a new robot movie many times.</i>	<i>If you've been waiting outside the theater with us, then you probably love robots, too!</i>
