Let's Start!

Someday robots may help care for us.

Learning Outcome

Explain about technology and technical problems in communicative situations.

Ask your partner:

- How would you feel about a robot caregiver for you or your child?
- How are robots helping humans today?
- Explain what you think a cyborg is.

Can Do Statements

- I can talk about technology and gadgets.
- I can speculate about feelings and impressions.
- I can talk about wishes and imaginary situations.

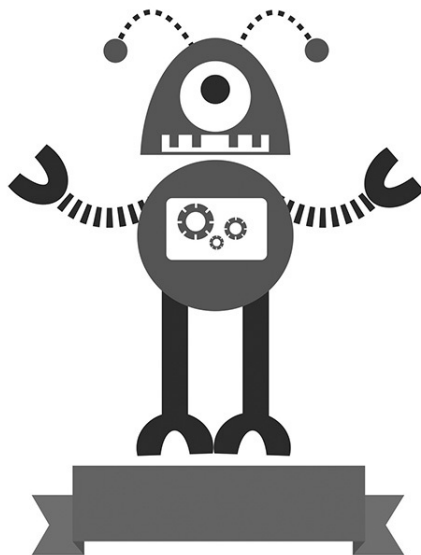

Let's Explore!

Is ***The Six Million Dollar Man**** really in the future?

* In the 1970s, "*The Six Million Dollar Man*" was a popular TV show featuring an astronaut rebuilt bionically after an accident.

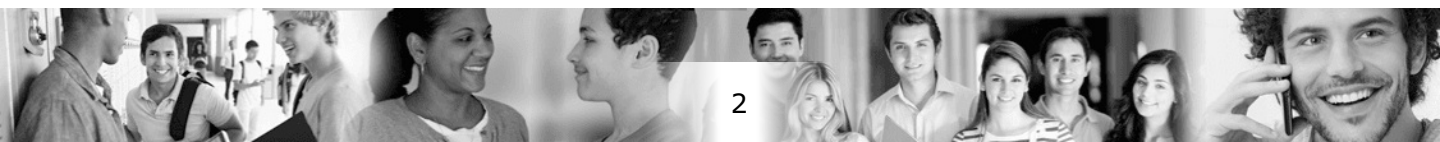

Instructions: Read the text aloud.

They might not be on your street or in your home yet, but robots will someday become a major part of our lives. In the near future, they may move as easily as people. Soon hospitals could start using robots to lift disabled patients from their beds. Social robots might become companions. Wouldn't every child wish they had a robot as a friend if it were possible? Wouldn't the elderly enjoy having someone to keep them company if they could?

Today, if you had trouble eating, a robot could feed you. If you were paralyzed, a robotic exoskeleton walking apparatus would help you walk. If you needed a prosthetic robotic hand, you could get one today. In the near future you might trade it for one that sends electric signals to your brain, giving you the sense of touch. If you had severely impaired vision, bionic eyes would allow them to perceive light. Bionic eyes can't restore sight yet, but, in time, they may.

Robots have arrived. They may not look like the ones we see in movies. Nevertheless, they are here among us.

Soon robots will help us do many things!

Instructions: Read the text again. Select all the correct answers.

What things may robots do or do for us in the future?

1. become companions
2. restore sight
3. be a friend
4. keep you company
5. perceive light
6. move as easily as people
7. send electric signals to your brain
8. take you to the movies

Let's Practice!

Robots could live with us very soon.

Instructions: Choose the words from the Word Bank to correctly complete the sentences.

Word Bank

disabled / future / companions / street

1. They may not be on your _____ or in your home yet.
2. In the near _____, they may move as easily as people.
3. Soon hospitals can start using robots to lift _____ patients from their beds.
4. Social robots may become social _____.

Extension Activity

Find out what The Barenaked Ladies would do if they won a million dollars.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Go online and look up the song and lyrics to "If I Had a Million Dollars" by The Barenaked Ladies.
- Listen to the song and write down all of the things that they would spend the money on.
- Listen several times so you catch as many words as possible.
- Check what you have written with the lyric sheet for the song.
- If you are feeling adventurous, sing along with the song!
- Finally, write down 5 things that you would do if you won a million dollars.

Self-Assessment

Yes

No

I find and listen to a song that talks about wishes and imaginary situations like winning a million dollars.

☐ ☐

I listen for and identify what they would do with the money.

☐ ☐

I say what I would do in the same imaginary situation.

☐ ☐

Target Words

- **disabled** (adjective): physically or mentally challenged
e.g. In Japan robots already help the physically disabled.
- **companion** (noun): someone you spend time with
e.g. Social robots might become companions.
- **elderly** (noun): advanced in age
e.g. The elderly enjoy having someone to keep them company.
- **impaired** (adjective): damaged; weakened
e.g. Bionic eyes allow people with severely impaired vision to perceive light.
- **bionic** (adjective): using artificial ways to produce movement
e.g. Bionic limbs are becoming a reality.
- **to perceive** (verb): to notice; be aware of
e.g. Bionic eyes allow people to perceive light.

Learning Points

Modal Verbs for Speculation

You can use modals to talk about degrees of certainty.

You use them to describe what is definite, probable, possible, or impossible from the speaker's point of view.

You can use *must*, *may*, *might*, and *could* to describe degrees of certainty.

Must = You are quite sure / It's a good guess

Couldn't / Can't = You are quite sure it's not / It's a good guess it's not

May / Might / Can / Could = maybe

May not / Might not = maybe it's not

Modal	Meaning
<i>Soon hospitals could start using robots.</i>	maybe they will start using robots
<i>Social robots might become companions.</i>	maybe they will be companions
<i>The robots may not look like the ones we see in movies.</i>	maybe they will not look like movie robots

Learning Points

Talking about Wishes and Imaginary Situations

You use *wish* to talk about things you do not have/do or cannot have/do.

You use the second conditional to talk about situations that are possible, but not likely.

The second conditional can be used in the affirmative, negative and interrogative forms:

Second Conditional	
Affirmative	<i>If we went early, we could get good seats.</i>
Interrogative	<i>Could we get good seats if we went early?</i>
Negative	<i>We could get good seats even if we went early.</i>

Examples:

- *Wouldn't every child wish they had a robot as a friend if it were possible?*
- *Wouldn't the elderly enjoy having someone to keep them company if they could?*
- *Today, if you had trouble eating, a robot could feed you.*
- *If you were paralyzed, a robotic exoskeleton walking apparatus would help you walk.*
